Introducing Blinds + Glass XL: the latest innovation in enclosed blinds.

Homeowners like you are looking for ways to add more natural light in your home design. The desire to connect to nature is stronger than ever, and architects and home designers are addressing that need by including larger windows and glass doors in homes. At the same time, you also expect your home to offer you privacy and a sense of security.

Many homeowners struggle to bridge the gap between these two desires, leaving you with the tough task of finding a makeshift solution with limited materials. Thankfully, we've got the answer.

Blinds + Glass XL is the only enclosed blinds solution on the market that covers an area up to 28ft². The product size range is 9"-63" x 46"-90", meaning that homeowners can get both light and privacy in extra-large sizes, in configurations up to 8' tall.

Enclosed blinds are easy to clean, safe for children and pets, and offer advanced privacy controls. And now they're available for extra-large bath windows, picture windows, overlooks, and sliding or folding patio doors! Whether you want to add blinds to your viewing areas or want to add privacy to your patio doors, Blinds + Glass XL is the solution.
